About Us

For over 30 years, Athens Technology Center (ATC) has been designing, developing and supporting leading technology solutions for the news industry globally, serving publishers with **newsasset Suite**, an all-in-one, editorial, digital asset management & multichannel publishing platform. This cloud based system covers the publishing production process end-to-end, while streamlining the enterprise workflow, from editorial & issue planning, tracking, and automatic layout to the seamless cross channel publishing of multimedia news, all from one system. Newsasset incorporates specialized tools that support journalists in verifying content residing in social networks along with in depth twitter account profiling.

ATC has established Newsasset LTD, its subsidiary in the United Kingdom and ATC International, based in Belgium.
