

ATC upgrades its internal organization and operations according to international ISO standards 45001:2018

Athens, March 28th, 2023

Athens Technology Center (ATC) actively reduces the risk in the workplace and further invests in the well-being, health and safety of its personnel, following its official certification according to the International Occupational Health and Safety Management Standard ISO 45001:2018. The process was successfully completed with the invaluable guidance and support of Priority, a leading Management, IT and Training consulting firm in Greece.

The specific standard concerns the strengthening of the existing Integrated Management System (**ISO 9001:2015, ISO 14001:2015**) that ATC currently applies, in the context of creating an **even safer work environment and a healthier workforce**, by focusing on eliminating any hazards that may jeopardize the physical and/or mental well-being of its employees.

Among other things, this certification:

- Augments the levels of trust associated with the company's reputation, particularly concerning its interactions with clients and other stakeholders (including visitors, suppliers, contractors, and partners).
- Reinforces the company's competitive edge by enhancing its eligibility for participation in European projects and public tenders.

It is reminded that **Athens Technology Center (ATC) is also certified and in accordance with:**

- International Quality Management Standard ISO 9001:2015 (September 2000)
- International Environmental Management Standard ISO14001:2015 (January 2013)
- International Information Security and Privacy Management Standards ISO/IEC 27001:2013 (April 2014) & ISO / IEC 27701: 2019 (April 2022)
- International IT Service Management Standard ISO/IEC 20000-1:2018 (September 2022)
